Description

The EDC Med Kit is a compact first aid kit, perfect for everyday use when a tactical med kit isn't necessary, and you only need the essentials. It has a straightforward design - like a pouch that opens with a zipper - and inside, it has two mesh pockets to hold the most needed items. An additional pocket on the outside, made of elastic material, is perfect for carrying gloves, allowing you to start helping by first protecting your hands.

This is a smaller version of the Mini Med Kit, to which we've added an elastic front pocket and a paracord loop for easy attachment to pants. Moreover, the EDC Med Kit has a single row of MOLLE/PALS tapes, and it can be attached even to everyday products like the Possum Waist Pack, Bandicoot Waist Pack, or Chest Pack Numbat.

No medical equipment included.

Features:

- 3 pockets for equipment
- Front elastic pocket
- MOLLE/PALS system
- Paracord loop
- YKK zipper

Weight [g]
