Description

Attachment straps to a tactical vest

Cummerbund is a set of two side panels that allows you to fasten the front and back parts of the vest. Thanks to the universal design, the product is compatible with other plate carriers available on the market. The cummerbund is made of durable construction mesh ensuring adequate ventilation, even with the equipment installed. A modular system compatible with MOLLE/PALS is sewn on the surface. A skeleton panel made of non-slip Hypalon material is sewn under the straps of the modular system, which not only stabilizes the equipment being carried, but also ensures the appropriate stiffness of the cummerbund itself. The panels are attached to the vest using Velcro. Anti-slip Hypalon handles make it easier to firmly grip the cummerbund when fastening and unfastening it. **Features:**

- Simple design, easy to mount on the vest
- The central part is stiffened with anti-slip material

Cummerbund dimensions:

- Size M: 49.5 cm x 12.5 cm/7 MOLLE cells
- R. L: 53.5 cm x 12.5 cm/8 MOLLE cells
