Description

The Guardian Military Set is for professionals in active military service. It consists of three key components: the Guardian Plate Carrier, the Guardian Cummerbund, and the Guardian Flap front panel. The modular Guardian Military set allows for easy customization and additional attachments. Each user can tailor their set according to their operational needs.

The Guardian Plate Carrier is the foundation for building a full tactical set. It serves primarily as a carrier for ballistic plates. Front and back pockets are designed for carrying plates, while the stretchy interior material allows for adaptability to plates of varying shapes and thicknesses. The carrier is MOLLE/PALS compatible, enabling users to attach any gear that meets this standard. The Guardian set is available in multiple color options, including various camouflage patterns, for seamless integration with uniforms.

The military version of the Plate Carrier Guardian comes equipped with a Guardian Cummerbund and a front panel, the Guardian Flap. This makes the set ready for immediate use upon purchase. The cummerbund is fitted with MOLLE/PALS compatible straps, providing extra space for gear. The standard cummerbund can easily be replaced by the Guardian Cummerbund Quick Release. The set also includes the Guardian Flap front panel, with MOLLE/PALS compatible straps and a pocket for carrying three AK/AR magazines. The flap can be replaced with the Guardian Kangaroo Flap, which is compatible with both the Law Enforcement Insert and the Competition system inserts.
