Care and Maintenance

- Wash at or below 30°C.
- Do not bleach.
- Do not tumble dry.
- Do not dry clean.
- Do not iron.
- Air dry naturally in a shaded environment.
- Store uncompressed to maintain insulation loft.

Regulations and Standards

• ECWCS Level 7 design principles (3rd generation system).

- Climashield® Apex $^{\text{\tiny{IM}}}$ continuous-filament insulation.
- YKK high-durability zippers.
- Chemours $^{\text{\tiny{IM}}}$ Teflon $^{\text{\tiny{B}}}$ coating for water resistance.

Other Useful Information

The Level 7 jacket is Helikon-Tex's warmest insulated outer layer. Compared to lighter models like the Wolfhound, it uses thicker Climashield $Apex^m$ insulation for improved thermal retention. Internal pockets help dry wet gloves or equipment by using body heat, while fleece-lined external pockets provide comfort in cold environments. The lightweight ripstop shell resists tearing and is treated with Teflon® for additional weather protection. Despite its high insulation, the jacket remains compressible and lightweight thanks to advanced continuous-filament construction. This makes it suitable for both tactical applications and civilian outdoor use where reliability in deep cold is essential.

Glossary of Terms

- ECWCS: Extended Cold Weather Clothing System a U.S. militarydeveloped multi-layer clothing system for extreme conditions.
- Climashield® Apex™: High-performance insulation with excellent warmthto-weight ratio and moisture resistance.
- Ripstop nylon: Reinforced fabric designed to prevent tearing.
- Teflon® coating: Chemours polymer treatment for improved water and stain repellency.
- YKK zippers: Industry-standard high-quality zippers known for reliability.
