Description

Place this Hobo Stove™ accessory on to the fire base of your 'Trekker' Kettle to create a highly effective wood fired Camp Stove.

- **Safe, easy and fun to use:** Creates stable cooking surface for pot or fry pan and the fire is safely contained within the unit.
- **Fuel efficient:** Heat is directed toward the pot or fry pan on the top.
- **Works in all weather conditions.**
- **Uses any solid fuel.**
- **Compact & Tough:** Packs away *inside* the Kelly Kettle fire-base

Use anytime with or without the Fire Base when you need a surface for cooking. Simply place the Hobo Stove on the ground and build the fire inside

While the Hobo can be used on an aluminium fire base, you run the risk of overheating the aluminium and ruining that base. We recommend the Hobo Stove accessory be used with our Stainless Steel bases.

Our steel Cook sets fit inside the Hobo for packing .

Please note: The 350ml Cup will fit inside the smaller 'Trekker' Cook set (but the larger 500ml cup is too large to fit), which fits inside this Hobo Stove, which fits inside the fire base (Trekker) which inverts up into the kettle really compact storage!!

As there is no need to carry fuel, this kit will keep your pack light and save you money at the same time - never worry about running out of fuel again! All fit neatly within the kettle itself for transport or storage.
