Description

A highly efficient Stainless Steel Outdoor camp Kettle (the fire base is also stainless steel) which is suitable for Trekkers, Hikers, Kayakers, Backpackers, Bikers, and all outdoors enthusiasts who need to keep their pack light. Also suitable for Car Camping and Wilderness Survival Kits / Disaster Kits.

This lightweight kettle fits neatly into a Rucksack or Backpack.

As there is no need to carry fuel, these kettles will keep your pack light and save you money at the same time - never worry about running out of fuel again! Using any naturally occurring solid fuel (sticks, pine cones, dry camel dung! etc.) this kettle will operate perfectly well, even in a storm and will bring 2 Mugs of water to a rolling boil within a matter of minutes. If more hot water is required (this kettle will easily boil water quickly for a party of 4-6 people), simply refill the kettle and place it back on the fire base and refuel the chimney again. The kettle will be boiled again within a matter of minutes where water can be used for more hot drinks, boil-in-the-bag, bathing, washing up, etc. A wonderful piece of camping equipment.

Properties:

- Our Small 'Trekker' Kettle in Stainless Steel.
- Boils 0.6 liters of water quickly using just Sticks, Pine Cones, Dry Grass, Bark, etc. Works in ALL weather conditions.
- Perfect for 1-2 people, Trekking, Hiking, Backpacking, Scouts, Couples, Kayaking, Picnics, Fishing, etc.
- Great Preparedness Item for Power Shortages, Storms & Emergency Kits.

ORDER CONFIRMATION

- A Green Whistle has replaced the older Orange stopper and lets you know when the water is boiled.
- Lightweight - Never carry fuel again! Height 26.5 cm. Only weighs 0.68 kg
- Now Comes With Upgraded Steel Fire-Base. Historically, the fire-bases were Aluminium which softened, warped and burned out quite quickly.

Add our popular **Hobo Stove accessory** to turn the fire-base into a stand alone wood fueled Camping Stove.

Additional Information	Diameter	14cm / 5.5 inches
	Display Weight	0.68kg / 1.5lb
	Product Capacity	0.6ltr / 21.1oz (UK)
	Height	27cm / 10.6 inches (Packed)

Note: Add our Pot-Support & Cook set to prepare small amounts of food (Noodles, Rice, Oatmeal, hydrate food, etc) over the kettle while your water boils. Boil and cook at the same time using only a handful of fuel! Or better still, add our Hobo Stove accessory to turn the fire base of your kettle into a stand-alone wood fuelled Camping Stove. See our Accessories Category for these products.

Fire Base & Drawstring carrying bag are included as standard with each Kelly Kettle. The durable steel fire base inverts up into the bottom of our kettles to make the unit as compact as possible for transport and storage.

Please note: The Kettle has been designed to boil water extremely fast in all weather conditions using very little fuel. When filled with water, the Kelly Kettle should always be carried upright to avoid any spillage/leakage from the water spout or chimney top.

Older Kettles may have an Orange Rubber or Cork Stopper. These MUST ALWAYS be removed before using the kettle. The Kettle must never be boiled with these older stoppers in the spout.
