Description

The KHS Inceptor is based on the highly respected U.S. Army specification: MIL-W-46374F used for special forces, also known as "GI Basic Field Watch," which is issued to most U.S. soldiers as part of their standard equipment. The very powerful C1 luminous markings illuminate the dial and hands reliably at night. The KHS Eagle logo is, for the first time, illuminated on the dial of the KHS Inceptor. Starting immediately at KHS, the Inceptor is now also available as an extremely robust digital watch! The digital Inceptor also features a solid stainless steel case with a screwed caseback and the ever proven hardened Mineral glass. All the functions of a Chronograph (stopwatch), the display background light and the alarm are easily controlled through the side-mounted stainless steel push buttons. The choice of 12 hour or 24 hour time and hourly chime are also, of course, available. The impressive quality at such a fantastic entry price makes this watch a perfect entrance into the world of KHS tactical watches.

- **Case**
Stainless steel case, black IP-coated, screwed stainless steel caseback, black IP-coated, stainless steel push-buttons, black IP-coated.
- **Watch glass**
Extra hardened mineral glass.
- **Water resistance**
