Description

KNIXS Power-Knicklicht Tactical Glow Stick - Infrared, 15cm, 8 h

The **KNIXS Infrared Glow Stick** is a chemical light source designed for tactical use with **night vision devices**. Once activated, it emits light in the **infrared spectrum**, making it invisible to the naked eye while clearly visible through NVG equipment.

Invisible Light for Tactical Applications

Unlike standard glow sticks, this IR version does not produce visible light. It operates in the near-infrared spectrum (**0.8 μm - 1.4 μm**), making it ideal for discreet marking, signaling, and identification in military or low-visibility environments.

- Visible only with night vision devices
- Perfect for marking positions and equipment
- Useful for navigation and coordination in the field
- Non-electronic, reliable light source

Simple and Reliable Activation

ORDER CONFIRMATION

Activation is quick and requires no tools or batteries. Simply bend the stick until it snaps internally and shake it to start the chemical reaction.

- Instant activation - no external power needed
- Reliable in harsh conditions
- Single-use, maintenance-free solution

Long-Lasting Performance

The glow stick provides **over 8 hours of continuous infrared illumination**, gradually decreasing over time.

Practical Mounting Options

The KNIXS glow stick features a **built-in hook** and includes a **lanyard**, allowing flexible attachment to gear, clothing, or equipment.

- Hook for hanging or attaching
- Lanyard included for versatile carry
- Can be worn, mounted, or suspended

Specifications

Type	Infrared chemical glow stick
Length	Approx. 150 mm
Diameter	Approx. 15 mm
Light spectrum	Infrared (0.8-1.4 μ m)
Runtime	More than 8 hours
Use	Single-use

Package Contents

- 1 × KNIXS Infrared Glow Stick
- 1 × Lanyard

Applications

- Tactical marking and identification
- Night operations with NVG
- Field coordination and signaling
- Training and simulation use

Safety Information

Do not cut, break, or open the glow stick. Do not ingest or inhale contents. Avoid contact with skin and eyes. In case of contact, rinse thoroughly with water and seek medical advice if necessary.

- Keep away from heat and direct sunlight

ORDER CONFIRMATION

- Not suitable for children under 3 years
- Use under adult supervision
- Contents may stain surfaces and textiles

Disposal

Dispose of the used glow stick in household waste after single use.

Glossary

- **Infrared (IR):** light spectrum invisible to the human eye but visible through night vision devices
- **NVG:** night vision goggles used to detect low-light and infrared sources
- **Chemical lightstick:** single-use light source activated by internal chemical reaction
