## Description

Lightstick is light emitting stick thanks to chemical reaction between two substances built in the lightstick's body. After bending lightstick inner capsule breaks letting both substances to mix. After activation light is starting to emit for at least 8h.

The lightstick has a hook at the top, with which it can be hung. In addition, there is a hole in the upper end, through which the supplied fastening string can be pulled. So you can wear the lightsticks around your neck or attach to other objects.

Product Specifications:

- Dimensions: Length: approx. 150 mm, diameter: approx. 15 mm
- Industry standard acc. material safety data sheet (MSDS)
- Luminous duration more than 8 hours, slowly degrading
- Flash point > 120 ° C
- Focal point > 400 ° C
- Waterproof up to 10 ATM
- No heat development and sparks during tripping
- New premium special hooks, including safety-tested neck strap for hanging and putting on
- Extremely robust outer shell, tapered upwards, not colored

Included: 1 lightstick, infrared + fixing string.
