Glossary

- **Second focal-plane (SFP) reticle:** Reticle remains the same apparent size as you zoom, so it covers less of the target at high power.
- **MOA:** Minute of Angle—angular measurement used for sight adjustment; 1 MOA $\approx$ 29.1 mm at 100 m.
- **Parallax-free:** Image and reticle appear in the same optical plane, preventing aim shift when your eye moves.
- **Argon filling:** Inert gas purge that stops internal condensation and corrosion.
