Description

MFSPC-S combat belt - lightweight, mid-ride combat belt system that comfortably carries your critical gear and holds up your pants. It's much more versatile than typical combat belts and much less bulky than a regular load carriage belt. It's configurable in multiple ways to facilitate your unique needs. It helps you move some gear off your vest and onto your hips for less back fatigue. Mid-ride belt accepts soft ballistic inserts. This combat belt is part of the MFSPC-S weight compensation system.

There are two ways to configure the belt to suit any operational need. The first configuration is to use it as a regular combat belt. The second configuration is putting the weight compensation systems adapter on, which lets you connect the belt to the plate carrier. It provides a very stable and integrated setup.

Properties:

- Made of premium materials - US-made Cordura® fabric and original Velcro® brand fasteners
- Configurable in multiple ways
- Part of the MFSPC-S weight compensation system
- Sold in full set - belt with Austrianpin Cobra Pro buckle and Molle sleeve.

About MFSPC-S "TRIDENT" system

MFSPC-S "TRIDENT" is a system developed through many years of professional experience in combat environments and the production of individual combat equipment. MFSPC-S is the leading personal equipment system in the Latvian military industry.

By conducting an international analysis in the context of world events, constructors of MFSPC-S have considered essential aspects of developing MFSPC-S for military personnel (ground infantry, mechanized infantry, scouts, SOF units, and other military and law enforcement units) which require the most functional, safe, high-quality equipment for their operating environment and specific needs for military applications by the requirements of the 21st century.

MFSPC-S configurations are suitable for scouts, JTAC, SOF, and other specialists not regularly on the front lines in direct contact with the

~~About Lumina Group~~ increased mobility capabilities are critical.
