### Care and Maintenance

This knife is made from **high-carbon Aogami Super steel**, known for extreme sharpness and edge retention. However, carbon steel is not stainless - proper care is essential:

- Always **dry the blade immediately** after washing - never let it air dry.
- Store in a dry place - avoid leaving it wet on magnetic strips or in drawers.
- Apply **camellia oil** or a neutral edible oil if the knife won't be used for a while.
- Avoid prolonged contact with acidic foods (e.g., onions, citrus) - these can accelerate rusting and leave patina stains.

- Do **not** put this knife in a dishwasher – heat and chemicals can damage both blade and handle.
- Use soft cleaning products like cream cleansers and non-abrasive sponges to remove discoloration.

### About Aogami Super Steel

Aogami Super (“Blue Super Steel”) is a high-performance carbon steel with excellent wear resistance and cutting power. It is the hardest steel in the Aogami family, thanks to the addition of vanadium.

#### Steel Composition:

- Carbon: 1.40 – 1.50%
- Chromium: 0.3 – 0.5%
- Tungsten: 2 – 2.5%
- Vanadium: 0.3 – 0.5%
- Manganese: 0.2 – 0.3%
- Silicon: 0.1 – 0.2%
- Phosphorus: 0.025%
- Sulfur: 0.004%

This steel requires advanced skills when used at higher hardness levels and is less tolerant to lateral stress, but in return offers superior edge sharpness and retention.

### Warranty

The knife comes with a **24-month warranty** from the date of purchase, covering hidden material or manufacturing defects under the following conditions:

- The knife is used according to its intended purpose.
- Proper maintenance and storage are followed.

**Note:** Damage from misuse or improper care is not covered.
