*approximately 30 seconds the light automatically returns to the previously used mode to help prevent overheating and protect the battery. Turbo can be reactivated at any time.*

### Design and Performance

The TRANSCEND™ 1500 is built with an **anodised aircraft-grade aluminium body** that provides durability while keeping the light compact and practical for daily use. The adjustable head strap mount allows the beam angle to be tilted for optimal illumination, while the reflective strap improves visibility in low-light environments.

The integrated **Smart Power Control** system helps balance brightness and runtime according to remaining battery capacity. The light also features a **direct-to-low function**, intuitive side-positioned power button and rotary mode selector dial for convenient operation.

With its **IPX7 waterproof rating**, impact-resistant design and **magnetic base**, this model is suitable for demanding use in workshops, maintenance work, outdoor environments and emergency situations.

### Specifications

<b>Maximum Output</b>	1500 lumens
<b>Maximum Beam Distance</b>	129 meters
<b>Battery Type</b>	Li-ion 18650, 3200mAh, 3.7V
<b>Charging</b>	USB-C rechargeable
<b>Waterproof Rating</b>	IPX7
<b>Resistance</b>	Waterproof and impact-resistant
<b>Material</b>	Anodised aircraft-grade aluminium
<b>Weight</b>	150 g
<b>Dimensions</b>	34 x 94.7 x 42.2 mm

### Package Contents

- NEBO TRANSCEND™ 1500 headlamp
- Adjustable reflective head strap
- USB-C to USB charging cable
- User manual

### Operation

- Rotate the dial to select High, Medium and Low modes
- Press the power button once to turn the unit on or off
- Double-tap for Strobe mode
- Press and hold for Turbo mode

When the light is in Strobe or Turbo mode, a single press turns the unit off. Strobe and Turbo can still be activated directly with their corresponding controls.

### Charging and Battery Indicator

Unscrew the magnetic base to access the rechargeable battery. Connect the USB cable to a power source and then connect it to the battery for charging. The charging indicator shows **red while charging** and **green when**

fully charged.

The power button also functions as a battery charge indicator:

- **Solid light:** charge is greater than 25%
- **Flashing light:** charge is less than 25%

### Important Notes

Do not shine the light directly into the eyes of people or animals. Avoid exposure to heat, hot surfaces, sparks or open flames. Do not incinerate the product or battery. Use the device only for its intended purpose.

### FAQ

**Can the TRANSCEND n1500 be used without the head strap?** Can be used as a compact work light. The integrated magnetic base allows it to attach to metal surfaces for hands-free illumination.

**What is Turbo mode used for?** Turbo mode provides a short burst of maximum brightness of 1500 lumens for situations that require strong illumination. To protect the battery and electronics, Turbo automatically returns to the previous mode after a short interval.

**How is the battery charged?** The device uses a rechargeable 18650 Li-ion battery and is charged via the included USB-C charging cable.

**Is this headlamp suitable for demanding outdoor or workshop use?** The IPX7 waterproof rating, impact resistance and magnetic base make it suitable for professional, workshop and outdoor applications.

### Glossary

- **Lumen:** A unit measuring the total amount of visible light emitted by a source. Higher lumen values indicate brighter light output.
- **IPX7:** A waterproof rating indicating the device can withstand temporary immersion in water up to 1 meter deep for up to 30 minutes.
- **Smart Power Control (SPC):** A system that automatically adjusts brightness depending on remaining battery capacity to optimise performance and runtime.
- **Turbo mode:** A temporary maximum-output mode designed for short bursts of very bright illumination.

### GPSR Safety Information

This product must be used only for its intended purpose. Do not shine the light directly into someone's eyes. If the light beam shines directly into your eyes, look away immediately. Do not use magnifying instruments that could concentrate the light beam. Keep the product away from heat, hot surfaces, sparks and open flames. Do not incinerate.
