Description

Origin Outdoors Discovery Map / Hiking Compass

Origin Outdoors Discovery Compass is a reliable **map and hiking compass** designed for precision navigation in the field. Its robust acrylic glass construction, luminous markings, and multiple scales make it ideal for hiking, trekking, and expedition use in both daylight and low-light conditions.

Aim of the Product

To provide outdoor enthusiasts, hikers, and explorers with a **durable and precise navigation tool** that allows accurate map reading, bearing, and orientation even in challenging environments.

Audience

- Hikers and trekkers navigating unfamiliar trails
- Outdoor adventurers and expedition members
- Search and rescue teams and field workers
- Students and instructors in land navigation training

Product Use

Designed for field navigation, this compass allows **precise bearing taking**

and map orientation through its 360° rotatable housing and integrated mirror bearing system. The luminous markings ensure visibility in dim light, and the magnifying glass aids in examining fine map details. Ideal for both day and night expeditions, and suitable for training or survival kits.

Key Features

- 360° rotatable housing for accurate bearing alignment
- Sturdy, transparent acrylic glass body for long-term durability
- Integrated magnifying glass for detailed map reading
- Luminous markings for low-light visibility
- Mirror bearing with sighting opening for precise orientation
- Declination scale for magnetic deviation correction
- Multiple scales: millimetres, inches, 1:24,000 and 1:50,000

Specifications

Dimensions	L 11 × W 6.5 × H 2 cm
Weight	76 g
Material	Transparent acrylic glass
Scales	mm, inch, 1:24,000, 1:50,000
Additional features	Luminous markings, mirror bearing, magnifier, declination scale

Other Useful Information

This compass combines classic mechanical reliability with modern design features. Its compact and rugged construction makes it a dependable companion for field training, tactical operations, and outdoor navigation where precision and durability are crucial.

Glossary of Terms

- **Mirror Bearing:** A method allowing you to sight an object while simultaneously reading the compass dial for greater accuracy.
- **Declination Scale:** A feature that compensates for the difference between magnetic and true north.
- **Luminous Markings:** Glow-in-the-dark indicators for use in low-light or night conditions.
