Description

Classic V Rackmount Case is a 5 RU watertight double-ended case engineered to supply secure transport for up to 100 pounds of electronic equipment. The lightweight roto-molded polyethylene case is engineered with a molded rib design that provides secure interlock stacking. The 19" rugged steel rack frame has M6 threads and features additional sway space to isolate and protect your gear during transit. Spring-loaded steel handles and four heavy-duty removable casters on the bottom assist you in transport, while locking cable catches offer additional security. Sealed gaskets ensure watertight protection and there's a pressure release valve to help you open the case. Hangers are included, providing convenient storage for the lids while in use.

Applications

- Audio/video recording and processing systems
- Satellite communication systems
- Radio communication systems
- Seismic data recording instrumentation
- Climate data collection
