Description

Due to the fact that at temperatures below the freezing point the gas starts to have a bit of a problem with the transformation of the state, it has to be helped a bit. That is why we have equipped Mantis with a preheater, which ensures the correct course of gasification and thus even and constant combustion.

Robust construction, low center of gravity and folding arms forming a base with a diameter of 6-15 cm allow cooking even in medium-sized pots.

Due to the fact that the Mantis cooker does not stand directly on the gas cartridge, it is possible to supply it from various sources, sometimes with the help of reductions.

Construction: Folding legs and shoulders allow the Mantis cooker to be folded into the supplied bag made of 3D mesh fabric, thus saving space in your backpack.

A wide burner with a power input of 3000W spreads the flame over the entire surface of the bottom of the pot and optimizes the efficiency of the stove. Connecting the cooker to the cartridge with a steel braided hose allows you to use the cartridge to the last residue.

Features:

- It uses screw cartridges with EN 417 thread
- Freestanding - higher stability, the possibility of full use of the cartridge

ORDER CONFIRMATION

- Weight: 145 g
- The wide burner with high power consumption ideally spreads the flame
- Folding legs and shoulders of pot support
- Supplied 3D mesh transport case
- Power consumption 3000W
- Made of high quality stainless steel

Technical parameters

Material	Stainless steel, Aluminum
Weight	145 g
Transport packaging	Yes, in set
Fuel	Gas
Connection type	Independently
Preheating	Yes
Piezo	No
Power	2850 W

Brand country - Czech Republic.
