Description

The self-supporting construction increases the stability of the cooker mainly due to the low center of gravity and low height. Robust construction and base diameter 5-16 cm allow the use of larger pots.

Thanks to the fact that the cooker stands alone and is connected to the cartridge by a hose, it is possible to use the refills up to the last remainder. In addition, this principle allows the use of different types of cartridges, but this always requires a reduction.

Features:

- Uses screw cartridges with EN 417 thread
- Freestanding - higher stability, the possibility of full use of the cartridge
- Weight: 230 g
- The wide burner with high power consumption ideally spreads the flame
- Folding legs and shoulders of pot support
- Supplied hard transport case
- Power consumption 3300W
- Made of high quality stainless steel

Brand country - Czech Republic.
