Description

For generations, high-quality scissors have been manufactured in the Italian town of Premana near Lake Como. Due to the use of high-grade materials, the attention to detail and European craftsmanship, the local scissors manufactories have asserted their position against the cheap Asian competitors and are highly esteem by their demanding clientele. The new scissors series Ringlock is especially innovative. The classical screw of the scissors is replaced by a specially designed and patented locking system. This Ringlock system is manufactured using a watchmaker's technology and works with a ring and an aluminum bearing. This provides a permanently precise functioning of the shear blades. The Ringlock system guarantees precise and long-lasting problem-free cutting and hence extends the lifespan of the entire scissors. All models are made of high-quality stainless steel with an exclusive surface treatment and convince with their modern design.
