Description

Highly effective headset with additional helmet mount. The modernized Earmor™ M32H headset protects against hazardous noise while allowing you to hear surrounding sounds and ensures team communication. They are detected by two directional microphones mounted on the outside of each cup and reproduced through loudspeakers located inside the earcups. Instead of the traditional headband, this model is equipped with mounting to rails helmets FAST and similar. The M32H provides hearing protection in noisy environments with impulsive noise such as firearms use zones. The microphones mounted in the earmuffs improve the situational awareness of the user, while allowing to hear sounds in the vicinity and protecting the hearing. Harmful sounds are limited to a safe level of 82 dB and low sounds are amplified. In order to facilitate the use of the set and adapt it to the user's needs, the headband with the microphone can be mounted on the right or left side. The cable with a NATO Military Standard 7.0 plug allows the use of the headphones with a radio (via an additional PTT module).

Features:

- Designed to be mounted on FAST MT helmets and similar
- Amplifies the sounds of the surroundings, reduces the sound of shots to a safe 82 dB
- Low-profile cups make the handling of weapons easier
- Three volume levels

ORDER CONFIRMATION

- Earmuffs suitable for both right and left-handed shooters
- Two separate, well-protected microphones ensure perfect sound direction localization
- High gain and natural sound processing
- Waterproof battery compartment
- Battery saving feature - automatic shutdown after 4h
- Microphone on a headband
- Possibility to mount the communication microphone on the right or left side
- Possibility to connect a PTT module with a radio
- Cable terminated with NATO Military Standard 7.0
- Adjustable padded headband
- Foldable design for easy transport and storage
- Improved battery compartment closure for easy opening
- Silicone loops to prevent loss of caps
- Improved metal battery cap
- System to prevent accidental shutdown
- Dynamic voice tracking
- Increased RF immunity
- Rugged housing
- Markings of the manufacturer and side (right-left) on the inside of the headphones
- Updated electronic components and dynamic microphones

Technical data:

- Noise attenuation value - 22dB
- Power - 2 x AAA
- Estimated battery life ~600 h
- Waterproof - IPX-5
- Standarts - CE / RoSH / ANSI S3.19-1974
- Weight - 370 g (without batteries)
- Color - foliage green
