Description

These quality - razor blades are made from stainless steel, ice-hardened and teflon-coated for a safe and clean shave.

These blades are manufactured in E.U. after Solingen quality standards, packaged individually in wax paper of 10 pieces in the new folding-box.

Suitable for all standard safety razors - at a very reasonable price compared to replacement blades of any system-shaver.

In the course of the ever increasing problem with plastic waste, we have decided to change the packaging of our razor blades. Sustainable, recyclable and environmentally friendly. The previous plastic dispenser is now a foldable, recyclable cardboard box.

The new packaging is 80 percent degradable and sustainably made from renewable material - without any plastic! The new packaging is also visually appealing and at the same time provides optimum protection for the razor blades against breakage and soiling.

Made in EU.
