4. Split the pouch at the lower tear notch and enjoy!

Freeze-Drying Process

Freeze drying is the gentlest method to remove water from food, preserving the shape, structure, taste, and aroma. In vacuum-packed conditions, these meals can last exceptionally long without preservatives. In the **REAL Turmat** series, soups and stews undergo freeze-drying to lock in flavors and nutrients. The ice in the product sublimates directly into vapor without turning liquid, maintaining maximum quality.
