Description

Reliance Rebreath CPR Face Shield with Valve in Keyring Pouch

The **Reliance Rebreath CPR Face Shield with Valve in Keyring Pouch** is a **Class I medical device** designed to provide a hygienic barrier during **mouth-to-mouth resuscitation**. It incorporates a **one-way valve** that allows air to pass to the patient while reducing the risk of cross-contamination. This version includes a **compact keyring pouch**, allowing the device to be carried conveniently on a daily basis while maintaining the same functionality as the standard CPR face shield used in first aid kits.

Key Features

- **Class I medical device**
- **One-way valve** for controlled airflow during CPR
- **Barrier protection** to reduce infection risk
- **Compact keyring pouch** for convenient transport

ORDER CONFIRMATION

- **Transparent film** for correct positioning
- **Suitable for first aid kits and emergency use**

Design and Functionality

The device consists of a transparent plastic barrier with an integrated **one-way valve**. The valve enables expired air ventilation while preventing reverse airflow, supporting safer resuscitation procedures.

The included pouch with keyring allows the medical device to be easily carried and stored, increasing the likelihood of availability in emergency situations without affecting its intended medical function.

Applications

- First aid kits
- Emergency response situations
- Workplace safety equipment
- Vehicles and travel kits
- Training environments

Specifications

Product Weight	14 g
Dimensions	55 × 55 × 10 mm
Valve Type	One-way valve
Shelf Life	5 years
Storage Conditions	Dry, cool place
Product Reference	REF: 854

Regulatory Information

This product is classified as a **Class I medical device** under Rule No. 1 and complies with applicable medical device regulations (SI 2002 No. 618).

Important Information

This device is intended to provide a hygienic barrier during resuscitation. Proper CPR training is recommended for effective use.

FAQ

Is this a medical device? a Class I medical device intended for use during resuscitation.

What is the difference compared to the standard version? keyring pouch for easier transport and accessibility.

Is it reusable? intended for single-use in emergency situations.

Can it be included in first aid kits? first aid kits and emergency equipment.

Glossary

- **CPR:** Cardiopulmonary resuscitation.
- **One-way valve:** A valve allowing airflow in one direction only.
- **Barrier device:** A device reducing contamination risk during resuscitation.
