### Description

#### **Reliance TraumaFix Tactical Trauma Dressing - 20 × 19 cm**

The **Reliance TraumaFix Tactical Trauma Dressing** is a sterile, single-use **medical device** designed for rapid control of **severe external bleeding**. It combines a large wound dressing with an integrated **pressure pad** and elastic bandage, allowing effective compression in emergency situations. Developed for use in demanding environments, this tactical version features **waterproof packaging** and a camouflage design, making it suitable for military, law enforcement and outdoor use.

### Key Features

- **Integrated pressure pad** for effective hemorrhage control
- **Elastic bandage** for secure compression
- **Hooped tail** for one-handed application
- **Anti-unravel system** with hook-and-loop fixation

## ORDER CONFIRMATION

---

- **Vacuum-packed sterile dressing**
- **Waterproof outer packaging**
- **Camouflage design** for tactical environments

### Design and Functionality

The TraumaFix dressing combines a large sterile wound pad (20 × 19 cm) with a durable elastic bandage. The integrated **pressure pad** increases localized compression to help control heavy bleeding.

The **hooped tail** allows for fast and intuitive application, including self-application in high-stress conditions. Hook-and-loop elements prevent the bandage from loosening during use, ensuring consistent pressure even when the casualty is being moved.

The dressing is vacuum sealed in **water-resistant packaging**, protecting it from environmental factors and ensuring readiness in demanding field conditions.

### Applications

- Severe bleeding and traumatic injuries
- First aid kits and IFAKs
- Military and tactical use
- Law enforcement and security
- Outdoor and remote environments

### Specifications

<b>Dressing Size</b>	20 × 19 cm
<b>Type</b>	Pressure trauma dressing
<b>Sterility</b>	Sterile, single use
<b>Packaging</b>	Vacuum sealed, waterproof outer layer
<b>Application</b>	One-handed possible

### Important Information

This is a **single-use sterile medical device**. Improper use may result in ineffective bleeding control. Training in first aid or trauma care is recommended.

### FAQ

**What is the purpose of this dressing?** Control external bleeding by applying direct pressure to the wound.

**Can it be applied with one hand?** Yes for one-handed application, which is important in self-aid situations.

**Is it reusable?** Sterile, single-use medical device.

**Is it suitable for tactical environments?** Camouflage design make it suitable for field use.

### Glossary

- **Pressure dressing:** A bandage designed to apply compression to control bleeding.
- **Hemorrhage:** Severe or uncontrolled bleeding.
- **IFAK:** Individual First Aid Kit.
