Description

The first Arkansas whetstones delivered excellent results in numerous preliminary tests and offer everyone who prefers sharpening on a whetstone the familiar grinding sensation. As with the oil stones, natural Novaculit is the decisive component. However, as is usual with whetstones, it is enclosed on a matrix. This structure ensures high effectiveness as well as a very long life span compared to Japanese whetstones. The stones are generously dimensioned at 20.3 x 7.6 x 2.5 cm and come with an anti-slip silicon pedestal. The available dressing stick ensures an optimal grinding surface for its entire life span. 400/1000/3000/6000/8000 grain for more exacting requirements.

Made in USA.

RH Preyda

The oil stones of RH Preyda are mined by hand in Hot Springs in the Ouachita Mountains in Arkansas, the only single area where they can be found. The company was founded in 2013 and produces exclusively natural sharpening devices and the matching accessories. The extremely high quality stones are anything but ordinary.
