Description

Rhino Rescue CLC IFAK Level-II First Aid Kit

The **Rhino Rescue CLC IFAK Level-II** is a compact, tactical first aid kit designed for quick response in professional and high-stress situations. This individual first aid kit (IFAK) provides essential emergency medical supplies in a durable, easily accessible setup. Constructed with high-quality materials and organized for efficient deployment, this IFAK is ideal for field use, supporting medical personnel and individuals in tactical and emergency environments.

Kit Design & Materials

The two-piece IFAK bag is crafted from **Cordura® material**, a strong and abrasion-resistant fabric made from 100% polyamide, known for its durability and resistance to tears. The **Duraflex® buckles** ensure secure closure and longevity under pressure. With a MOLLE/PALS (Modular Lightweight Load-carrying Equipment / Pouch Attachment Ladder System) compatible design, this kit attaches firmly to other tactical gear, allowing for modular customization and quick detachment.

The pouch can be detached from its platform with a single pull thanks to its strong **Velcro® fastening system** on the back, allowing for immediate access during an emergency.

Contents of the CLC IFAK Level-II:
