Description

Rhino Rescue LED Penlight – Diagnostic Pupil Light (Coyote)

The **Rhino Rescue LED Penlight** is a compact and reliable diagnostic tool designed for medical and first aid use. Built from **anodised aluminium alloy**, it combines durability with lightweight construction, making it ideal for everyday carry in medical kits.

Designed for Medical Use

This penlight provides a **bright, natural white light**, suitable for checking pupil response and performing basic examinations. Integrated measurement markings make it a practical tool for quick assessments in the field.

- **Pupil gauge** for evaluating pupil size
- **5 cm ruler** for quick measurements
- **Clear white LED light** for accurate diagnostics

Durable and Practical Construction

Made from **anodised aluminium**, the penlight is resistant to wear and designed for regular use. The concave head protects the bulb from damage, while the rubber switch prevents accidental activation and helps preserve
