Description

Silva Ranger 360 Global Outdoor Compass

The **Silva Ranger 360 Global** is a lightweight (33 g) base-plate compass engineered for reliable navigation *anywhere in the world*. Its global needle, slope-measurement card and distance-measuring lanyard give hikers, mountaineers and hunters a full tool set for safe route-finding day or night.

Aim of the Product

Built to provide fast, accurate bearings, avalanche-slope checks and map distance readings on every continent-no zone-specific compass needed.

Audience

Perfect for outdoor enthusiasts, backpackers and adventure racers who need a dependable, easy-to-handle compass with world-wide compatibility and night-navigation capability.

Product Use

- Place the **slope card** on contour lines to estimate incline for avalanche risk or extra effort.
- Measure trail length with the **soft, detachable lanyard** (1:25 k & 1:50

k scales bend to curves).

- Grip the **DryFlex™ rubber** bezel and rotate the housing using the SILVA 1-2-3 System® to set bearings.
- Use the built-in **magnifying lens** for pinpoint map work; luminous markings glow up to 4 h after light exposure.
- Rely on the **global needle** for correct north in all magnetic zones; waterproof build shrugs off rain and snow.

Specifications & Technical Details

- **Article No.:** 37684
- **Material:** Acrylic / PC-ABS / TPU
- **Weight:** 33 g
- **Dimensions:** 55 × 111 × 10 mm
- **Temperature rating:** -20 °C to +60 °C
- **Measuring scales:** mm, 1:25 000, 1:50 000
- **Needle:** Finest Swedish steel, high magnetic performance
- **Special features:** DryFlex™ grip, curved tail for hand fit, luminous 4 h markings, waterproof capsule
- **Included accessories:** Detachable safety-release lanyard (2 map scales), slope card

Other Useful Information

Key Feature Glossary

- **Global Needle:** Balanced to work in northern, equatorial and southern magnetic zones.
- **Slope Card:** Quick tool for avalanche angle checks and estimating extra distance on steep ground.
- **Declination Scale:** Internal reference to offset the difference between magnetic and true north.
- **DryFlex™ Grip:** Textured rubber on the bezel for precise rotation—even with gloves.
- **SILVA 1-2-3 System®:** Three-step method for taking and following bearings with a map.
