Description

SILVA Ranger features DryFlex™ grip for easy handling and comes with a use-anywhere declination scale inside the capsule, a magnifying lens, and base plate map-measuring in mm and scales of 1:50000 and 1:25000. A go-anywhere tool for serious compass users.

The lanyard is soft and bendable and easy to place directly on to your route on the map. The new graphics contain a more distinct arrow (Ranger) and also a more contemporary font. The colors change to green and black to harmonize with the other outdoor assortment. If you are looking for a basic but yet functional compass for your outdoor adventure, Ranger should be your choice. Thanks to the magnifier you can make sure to see every detail on the map. Our Ranger S mirror sighting compass should be your choice when you must determine direction over long distances. Because you needn't lift your eyes from the compass in order to look into the terrain, the direction determined with the SILVA 1-2-3 System® becomes more accurate.

Features

Built in magnifier

Detachable safety-release scale lanyard: 2 scales, soft and bendable

Luminous markings that last 4 hours after activation in light,
