Description

Snigel Technical Equipment Vest 2.0 – Modular Tactical Utility Vest

Designed for organization, access and adaptability. The **Snigel Technical Equipment Vest 2.0** is a modular tactical utility vest built for professionals who require efficient equipment management and rapid access to essential tools. Its layout focuses on practical storage, adjustability and compatibility with modern load-carrying systems.

The vest features **multiple dedicated pockets** for tools, pens, glasses and accessories, along with a **high breast pocket** for quick access items. A **Velcro panel** allows identification patches or unit markings, while **MOLLE compatibility at the bottom** enables expansion with additional pouches when required.

Designed to adapt to different body types and mission requirements, the vest is **easily adjustable** and available with **two back size options**.

Integrated **cable handling on the sides** helps route communication or power cables cleanly and securely, reducing snag risks during movement.

Product sheet - [download](#).
