Description

A light weight and protective pouch that easily and quietly makes it possible to look at your GPS while walking.

- In the folded position the padded front of the pouch protects the GPS from shocks
- The open mode makes it possible to walk and look at you GPS without removing it from the pouch
- An elastic band around the antenna keeps the pouch folded up during transport/protected mode. Pull the tab on the elastic band and the bag folds out to marching mode
- On the back is our tuck in attachment system for quick and easy attachment on our equipment vest or similar
- There are also Velcro straps for attaching the pouch on a carrier strap
- Pouch weighs only 120 grams. It does not absorb water so it does not get any heavier in rain
