Spyderco

The first pocket knife from Spyderco has been manufactured in 1981, even back then they used the so called "Spyderhole", a round hole in the blade. With the help of the hole, the knives can be opened very easily and fast by only using the thumb of the leading hand. During the years Spyderco has become one of the world leading brands and is now worldwide the supplier of different emergency forces from the police and military. Countless innovations, perfect workmanship and using the best materials guarantee top drawer products.
