Specially formulated performance improving cleaner for Base and Mid layer items, increases wicking and speeds drying time, suitable for natural and synthetic materials.

- pH Balanced
- Suitable for natural and synthetic materials
- Maintain soft feel
- Increases performance
- Reduces odour build up

Base and Mid layers work in a polar opposite way to a shell garment, moving moisture through rather than repelling it. These technical fabrics are designed to regulate your body temperature and moisture, but over a time bacteria and body oil can lead to smell in fabrics. Often a base layers performance is reduced when washed with normal household products as they can contain silicones and other compounds that hinder this Moisture Vapour Transfer. The Strom base & mid layer cleaner is hypoallergenic cleaner that allows treated garments to wick moisture away from the skin through layering system of your clothing. The silver ions combat odour and also aid with temperature regulation.

Not to be used on waterproofing garments.

Consist of:

- Inorganic salts
- surfactants

Usage: Shake bottle and pour 100ml into detergent compartment. Wash following garment manufacturer's guidelines.

Warning:

Causes serious eye irritation.

Keep out of reach of Children. Wash hands after contact. Wear protective gloves. Rinse eyes with water for several minutes.

Safety sheet: [here](#).

Made in England.
