## Description

Restores original finish to down filled garments and equipment leaving a patented abrasion resistant Eco friendly finish.

Many down filled items have a DWR treatment of the external face, this is to protect both the user and the performance of the down filling. Wet down is worse than no down. After a while the DWR starts to age and loses its water repellent properties. The item needs re-proofing when water doesn't form as drops on the fabric. Re-proofing can be done at home, by the domestic user with a simple wash in product. Our ECO Down Proofer is designed to be used in the same washing cycle as the Down Wash, saving on water and power.

This proofer is also PFC free, and is seen to be the choice product by many brands and environmental reports for its Eco status.

## ORDER CONFIRMATION

---

- Three times wash bottle
- PCF Free Eco formula
- Heat Curing
- Suitable for all down filled items
- Abrasion resistant

**Usage:** Shake bottle, pour 75ml into conditioner compartment then wash following garment manufacturer's guidelines. For optimum performance use Storm Down Wash in detergent compartment in the same cycle. Ensure item is fully dried in a dryer and lofted well during drying.

The ECO Down Proofer requires a tumble dry. Dry for longer than expected and pause the drying and manually plump the item to ensure the down is evenly distributed throughout the garment. Ensuring Down filled items are fully dried helps with the performance and reduces the chance of smelly Down.

**Contains:** Polyurethane, Polymers, cationic.

**Warning:** Keep out of reach of Children. Wash hands after contact.

**Safety data sheet:** [here](#).

Made in England.
