Description

This versatile and high-tech short-sleeved base layer is perfect for varying conditions. It is suitable for professional and leisure use throughout the year. Round neckline and fitted sleeves. The hem is longer at the back.

Fabrics: 100% polypropylene, silver ionized / antibacterial

The material is made of a very flexible and skin-friendly silver ionized polypropylene mesh. The loops of the mesh knit store air which then adapts to the body temperature and balances out any variations in the ambient temperature.

Polypropylene does not absorb moisture, but transfers it away from the skin, always keeping it dry. Silver ionization prevents the growth of bacteria, so the garment stays odorless and fresh for longer. The treatment is done to the core of the fiber at the manufacturing stage, so the garment retains its properties throughout its life cycle.

All the seams are flat sewn seams, so the product is comfortable to wear and does not press or rub the skin.

Care: Wash at 60°C. We recommend washing in a wash bag to avoid the net knit sticking to the zippers/etc of other clothes. If you hang the garment outside between uses and air it for a while, you don't need to wash it so often.
