- C: 45 mm
- E: 116 mm
- curve: 8
- B: 14 mm
- D: 73 mm

Changing lenses:

Optional RX clip:

High-contrast lenses improve visibility in both bright and low-light conditions. Hydrophobic lenses are covered with a special water-repellent material, which provides higher comfort for wearing glasses in the rain. All of our frames are made of robust, flexible, shatterproof and anti-allergic material. The frames are mainly produced with the material TR90. A lot of our frames also have a RX clip adapter, the possibility of optical glazing, adjustable temples and nose pads as well as more beneficial features to ensure a good fit.

All Swisseye sports glasses have shatterproof polycarbonate lenses. All of these products protect to 100% UVA-, UVB- and UVC-rays and offer the highest optical quality without distortion.

The combined antifog/antiscratch-coating prevents all lenses from steaming up and scratches (not available for all photochromic/polarized and bifocal lenses). With the hydrophobic coating water rolls off the lens easily and particles are eliminated.

All models are produced according to the strict safety norm EN 12312-1 and offer 100% UVA-, UVB- and UVC protection.

SwissEye

The brand Swisseye was founded in 1998 in Germany. Since this year the company has been a successful producer of
