Description

Straight, hand-held sharpener with a construction made of ABS material, whose anatomical shape together with the bottom edge quarantee a safe and comfortable grip when sharpening. This model is universal, so it is suitable not only for knives but also for work tools. Inside the slot there are two carbide stones, between which we stretch the blade. Thanks to its rounded shape and small size, the sharpener can be carried in a pocket or transported in a car. The distinctive orange spine makes it easy to find the knife in the field. The knife only needs to be stretched 3-4 times, the pre-set angle of the stones keeps the knife in the groove all the time.
