The Laser 20 is a very lightweight, fully featured 20 litre daypack which is suitable for adventure racing, trail running and biking as well as walking/hiking.

1-4 Weeks

Note: Image is of 20L version, not of 30L version.

Description

This 20 litre superlight day pack is fully equipped for short hikes, adventure races and mountain biking and is amongst the lightest of its size available. It includes all the feature you would expect to find on a pack of this type. In addition to the main compartment there are plenty of storage pockets and safety features.

- The pack is compatible with a hydration system - a pocket inside the main compartment holds the bladder in place and there are outlets for the tube on the shoulders
- The main storage area is accessed with a 'V' style opening which makes it easier to see what's inside than a traditional top opening rucksack
- A zip pocket which sits on top of the cover is ideal for storing valuables or small essentials
- The two huge mesh pockets on the side of the pack are ideal for storing drinks bottles or clothing
- The compression straps provide added security or when the pack isn't full they help prevent the contents from moving

- Two handy zipped pockets, which are ideal for valuables and on the go snacks, form part of the hip belt
- The inside of the back and shoulder straps have light padding and a mesh cover to keep you comfortable
- An adjustable chest strap and hip belt keep the pack in place when you are on the move
- A neat feature is the clear pocket towards the base of the back which holds an LED light in place (no more losing lights after they have become dislodged when clipped on the outside of a pack), there's also reflective detail on the pocket for extra visibility in low light or dark conditions

The pack is made with Litetex ripstop nylon fabric which has a DWR finish on the outer and PU coated backing for good water repellence and stain resistance.

The lightweight design of this pack makes it easy to stash in a travel bag if you're heading further afield.

Great for running, cycling, skiing or walking where low weight is important and you don't need a more structured back.
