Incredibly lightweight 35 litre pack which is great for backpacking, approach routes, multi-day adventure races and bike touring.

## 1-4 Weeks

### Description

The Laser 35 is an extremely lightweight rucksack with all the features you would expect to find for this type of pack. It provides 35 litres of storage but still comes in under half a kilo in weight.

- The top opening main storage area has a pocket to hold a hydration bladder in place, it also includes a removable 8mm foam pad for added comfort
- There are 2 side pockets with draw cords for external storage plus handy compression cords for carrying extra gear externally. If the pack isn't full the compression cords are great at holding contents in place while you're on the move
- The hip belt includes a useful zip pocket either side, ideal for keeping keys safe or for snacks, there's also another zip pocket on the top of the pack
- If you are cycling, you'll find the clear pocket lower down the pack a useful addition - it can house a rear LED light and has been designed to prevent lights popping off and getting lost when you're on the move
