The Laser 6 lightweight waist pack has been designed for day races and general running. It comes with lots of storage options enabling you to organise essentials for quick access when you're on the go.

1-4 Weeks

Description

The Laser 6 waist pack is a versatile carrying solution for smaller loads. It's designed to hold all your essentials in a well organised, easy to access way - enabling you to quickly refuel or find gear without wasting time when you are on the go. The low weight also means it's a great front bag for those smaller, frequently used items - which in turn saves time spent rummaging in your main pack every time you need a quick bite to eat! It's ideal for day use, running and day races as well as short walks or rides.

Features include:

- Two zipped hip pockets for 'on the go' snacks and valuables
- Compression cords on the top and front - tighten to keep contents in place when running or use them to carry extra kit or clothing externally.
- A zipped large main chamber with an internal pocket to hold a hydration bladder in place, the pack has two outlets for the tube.
- Reflective tabs on the front of the pack provide added safety in low light and dark conditions - these can also be used as an attachment point for a light for better visibility..
- A mesh panel on the back for comfort and to help wick sweat
- An adjustable clip waist belt.
