Description

Thermarmour Hypothermia Evacuation Bag 2.0 - Advanced Thermal Rescue System

The **Thermarmour Hypothermia Evacuation Bag 2.0** is a **high-performance rescue and evacuation system** engineered to prevent hypothermia and protect casualties in the harshest conditions. Designed for emergency teams, military units, and disaster relief operations, it ensures **life-saving thermal insulation** without the need for external heat sources – even in sub-zero environments.

Manufactured in the UK using the **Thermarmour X multilaminate composite**, the bag offers **outstanding thermal retention, waterproofing, and mechanical durability**. It retains heat even when wet, shielding against **cold, wind, and rain**. The durable base allows it to be **dragged over rugged terrain** for safe casualty evacuation in challenging rescue scenarios. Tested in both **Arctic Finland** and the **Antarctic continent**, it has proven reliable at temperatures as low as -25 °C.

Version 2.0 Upgrades

- Improved **wipeable base material** for easier cleaning and maintenance
- Reduced overall weight for enhanced portability
- Refined **face opening** with breathable, soft-touch fabric for comfort
- Upgraded **double-sided zip** system for smooth opening and closing
- Reinforced **inspection and access zips** for improved usability

Key Features

- **Multilayer Thermarmour X composite:** 8-layer laminate providing exceptional insulation and durability
- **Fire-resistant, waterproof, windproof, and non-conductive** design
- **Elastic hose-style hood** to reduce heat loss from the head and prevent chimney effect
- **Four treatment openings** for medical access during evacuation
- **Eight reinforced carrying handles** tested up to 260 kg load
- **Integrated tow harness with carabiner** tested for up to 1.5 km drag distance
- **Absorbent internal pad** and padded base for additional patient comfort and safety
- **Wipe-clean, machine washable at 40 °C** for reuse
- **Pocket for triage/patient card** and durable zippers on all openings
- Patent pending **multifunctional laminate technology** (GB2631985)

Technical Specifications

Product Name	Thermarmour Hypothermia Evacuation Bag 2.0
Material	Thermarmour X 8-layer laminated composite
Color	Olive
Length	230-236 cm (fits individuals up to 2.2 m tall)
Width	56-150 cm (accommodates spine board)
Pack Size	Approx. 51 × 53 × 8 cm
Weight	3.0-3.6 kg
Max Load	260 kg (tested)
Sheath & Carry	Includes integrated tow harness and carabiner
Cleaning	Machine washable at 40 °C, wipeable interior
Temperature Range	Tested down to -25 °C
Certification	CE-marked Class I medical device (EU MDR 2017/745)
Declaration of Conformity	View PDF
Specification Sheet	Download PDF

Made in	United Kingdom
---------	----------------

Applications

- Rescue and emergency medical services
- Military and tactical operations
- Disaster relief and field hospitals
- Search and rescue teams
- Expeditions and polar environments

Advantages

- Prevents hypothermia for several hours – **no external heat source required**
- Tested in **Antarctic and Arctic conditions**
- **Reusable** and machine washable for long-term field service
- Designed for **easy transport and patient comfort**

Manufacturer

Interweave Textiles Ltd.

Interweave House, Unit 1A, Lowfields Business Park, Old Power Way,
Elland, West Yorkshire HX5 9DE, United Kingdom
