Description

The UltiLink by Ulticlip is a modular quick attachment system that allows quick attachment and detachment of MOLLE equipment, scabbards, holsters, magazine carriers and other gear. The UltiLink's modular concept makes it especially easy to transfer items between different MOLLE systems, tactical waistcoats, belts, backpacks and from person to person.

The composite and stainless steel fastener offers 12 attachment angles that allow horizontal, vertical and diagonal carrying. With the UltiLink, equipment can be quickly removed, repositioned and reattached. The system can also be easily expanded.
