## Description

Adjustable belt slots. For belt up to 6 cm high. High position, holster grip on the middle belt line. The system allows a rotation of small angle for a better draw and a  $90^{\circ}$  rotation to be used in the car. The lever for adjusting the angles is on the sides. Ambidextrous design for easy switch between left and right mounting.

color: black • Material: polymer

## ORDER CONFIRMATION

The graphic (see photo) illustrates the relation between the belt line and the position of the weapon in the holster.

The Identification of Position describes the location of the belt mount. This holster has the following position:

IP+1: The weapon grip is high in respect to the belt. This is useful when use occurs in a vehicle, where the weapon may press on the seat and this create a dangerous situation, or even hinder draw of the weapon. Brand country - Italy.
