Description

Warrior's Elite Ops 901 Elite 4 is set up on the 901 Front Opening (Patent Pending) MOLLE Platform which has revolutionised the use of the modern Chest platform. The 901 base has always been the basis for all the 901 rigs, and we all know how good this kit is when used in an SF Role, the only draw back has been that you need your buddy to help you fit it correctly before each Op. Thats why Warrior with the help of current SF Operators have introduced this variant, which is a front opening system comprising a heavy duty size 10 zip, 2 inch full velcro closure and backed up by 3 press studs for additional security, this allows the user to get in and out of the rig at speed and without any assistance.

This is the latest vesion with 3 D Spacer Mesh Lining for comfort and cooling, the new wider upper folding section is now 6 MOLLE loops wide allowing larger items such as Command Panels to be attached. This wider upper section now also allows a 10 x 12 Inch Ballistic Plate to be worn, turning the 901 into a versatile low profile Armour Carrier.

The Warrior Elite Ops 901 Elite 4, comes with the following as standard; 4 x Warriors G36 Open Mag Pouches (Each Pouch holds 1 x PMag G36 Mags), 2 Utility Pouches, Admin Pouch with New GPS / Strobe Pouch (also holds I Phone etc), and a single Pistol / Small Torch Pouch.

Also compatible with Warrior's Back Panel (sold seperately).

500D Cordura Performance Specifications:

Weight: 7.1 Ounces per Square Yard

Tensile Strength: Warp 453 lbs / Fill 348 lbs

Tears Strength: Warp 14.1 + lbs / Fill 14.1 + lbs

Abrasion: Wear Cycles 1955

Water Repellency: 100%

Webbing:

Genuine US Mil Spec Webbing

50mm (2 Inch)) Breaking Strain: 2200 lbs

Threads:

Thread quality is fundamental to the construction, durability and strength of tactical equipment.

Two factors have a negative impact on the life Span of threads

- 1) Mildew is one of the most common factors in the deterioration of military kit, causing it to rot and ultimately results in unacceptable failure.
- 2) Sunlight has a harmful effect on the performance of threads, and over time causes their deterioration.

Warrior only uses the highest quality US Mil Spec nylon threads imported from the USA which are threatened against both UV and Mildew.

Infra-Red Properties

All our Clips, Fabrics, Plastic Hardware, Threads and MultiCam/Coyote Webbing are treated at source to deliver the lowest I.R. Signature possible.

Plastic Hardware

Warrior only uses the highest quality ITW Military rated Clips and accessories imported from the USA
