Description

The WX DURTAC with advanced SmartTouch technology is a flame-resistant tactical glove designed to protect the hands of military and SWAT team members during forcible entry and high-risk operations. A one-piece knuckle guard molded with dense thermoplastic protects the back of the hand and the palm padding absorbs impact to reduce hand fatigue in the field. The molded knuckles give you secure protection when operating in buildings or in your tactical vehicle around sharp edges. Impact-absorbing knuckle protection is welded to the glove and delivers flexible protection against impact injuries and skin abrasions. When handling lethal and non-lethal explosives, military and SWAT team members are protected by flame-resistant Nomex. The WX DURTAC leather palm maintains connectivity in the field with touchscreen capable technology in the palm of your hand. The low wrist design gives you a very flexible feel when operating in small places or around your plate carrier. Clip-strap for easy storage and portability.

Moisture wicking heavy-duty lycra gussets for increased breathability. Ventilated fingers for increased airflow and comfort.
